Sprint retrospective

--->

the Sprint Backlog is composed of the **Sprint Goal** (why), the set of Product Backlog items selected for the **Sprint** (what), as well as an actionable plan for delivering the **Increment** (how).

What is Product Owner?

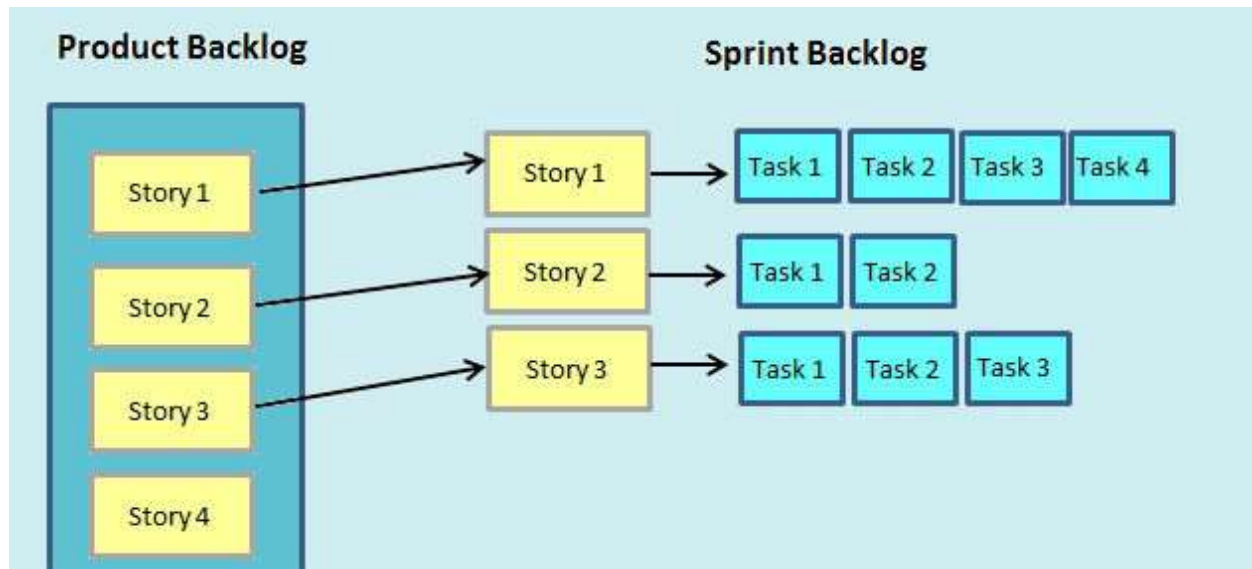

- Product Owner are to define user stories and create a product backlog
- The Product Owner is the primary point of contact on behalf of the customer to identify the product requirements for the development team.
- This product backlog will be a prioritized set of customer requirements
- During the Sprint, they answer queries on Developer's clarifications about how the product should function, what is expected, along with making the necessary trade-offs

- They are also involved in defining a clear 'Definition of Done' along with the Developers

What is Product Backlog?

- A product backlog is a prioritized list of work for the development team that is derived from the **roadmap** and its **requirements**.
- The most important items are shown at the top of the product backlog so the team knows what to **deliver first**.

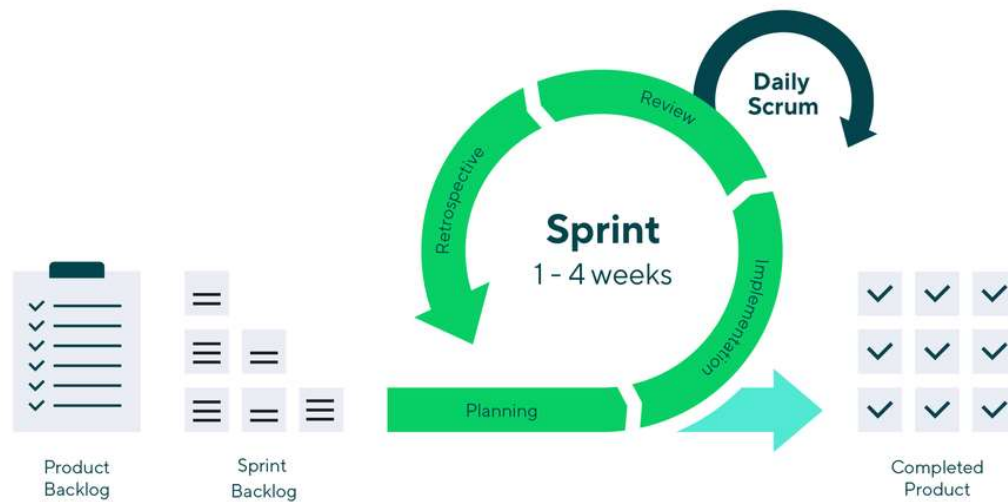

What is Sprint Backlog?

- The sprint backlog is a list of tasks identified by the Scrum team to be completed during the Scrum sprint
- The sprint backlog is a subset of the product backlog
- A clear sprint backlog prevents scope creep by clarifying exactly what your team will be doing—and not doing—during each sprint.

What is Sprint?

- a dedicated period of time in which a set amount of work will be completed on a project.
- It's part of the agile methodology, and an Agile project will be broken down into a number of sprints
- each sprint taking the project closer to completion.
- The sprint backlog is a list of tasks identified by the Scrum team to be completed during the Scrum sprint

What Scrum Master Do?

- A clear sprint backlog prevents scope creep by clarifying exactly what your team will be doing—and not doing—during each sprint.
- Their key responsibility is to remove flaws and help the team become more organized and empowered to innovate and make decisions.
-

What is Increment ?
